John T. Bey, Director of Criminal Justice 2023 Year-End Report

Executive Summary

Introduction: The role of the Director of Criminal Justice (DCJ) in overseeing the Dauphin County Corrections System is critical for ensuring the safety, security, and rehabilitation of individuals within our care. This report highlights the key initiatives and accomplishments of the DCJ and the Dauphin County Prison (DCP) during the year 2023.

Organizational Highlights: Under the oversight of the Board of Prison Inspectors, the DCJ spearheaded efforts to enhance the operations and effectiveness of the Dauphin County Corrections System. Collaborative planning and policy development were prioritized to align with the mission of promoting public safety and improving outcomes for individuals in the criminal justice system.

Internal Affairs Office Establishment: One significant achievement in 2023 was the establishment of DCP's first Internal Affairs Office (IAO) to ensure accountability and transparency within the facility. This included the formulation of an Internal Affairs policy and the recruitment of an IA investigator. A total of forty-six (46) Internal Affairs investigations and nine (9) Prison Rape Elimination Act (PREA) investigations were conducted throughout the year, demonstrating our commitment to maintaining integrity and addressing misconduct.

Enhanced Security Measures: In response to investigations revealing instances of contraband smuggling, several security measures were implemented to mitigate risks within the facility. Initiatives such as providing additional items to inmates upon intake, removing trash cans from outside the gated area, and implementing document scanning procedures have been instrumental in preventing the introduction of contraband into the prison environment.

Employee Welfare and Recruitment: Recognizing the importance of attracting and retaining qualified personnel, efforts were made to enhance employee welfare and recruitment practices. Securing a starting wage increase to \$26.00 per hour and implementing step raises over the first four years of employment have contributed to a more competitive compensation package for

the correctional staff. The County also negotiated a successful contract with the SEIU for the Treatment staff at Dauphin County Prison. Under the new collective bargaining agreement, the starting rates for several positions, including Treatment Specialist, were increased. As a result, current Treatment staff each received pay and equity increases. Additionally, a collaboration with Apollo Communications facilitated the launch of an exclusive recruitment campaign aimed at hiring Corrections Officers and Treatment Specialists.

Dauphin County Prison staff also are afforded a diverse range of training opportunities. In 2023, the leadership at DCP has continued to put an emphasis on effective communication strategies, de-escalation techniques, and a holistic approach to overall well-being for staff. In collaboration with Dr. Christian Conte, a well renowned mental health specialist we established a training initiative to enhance the de-escalation skills and improve communication and interactions between prison staff and inmates. Dr. Conte has worked with diverse groups, ranging from violent offenders to students to companies and organizations, to help them develop the knowledge and compassion that has the potential to transform lives. Through his Yield Theory approach to communication, the staff and leadership at DCP are given the tools to grow as leaders and public servants, combat stress and anger, and improve their general well-being.

Future Outlook: Looking ahead, the DCJ remains committed to fostering a culture of accountability, transparency, and continuous improvement within the Dauphin County Corrections System. We will continue to collaborate with stakeholders, implement best practices, and leverage innovative strategies to enhance public safety and promote positive outcomes for individuals involved in the criminal justice system.

Conclusion: In conclusion, the year 2023 has been marked by significant progress and achievements in advancing the goals of the Dauphin County Corrections System. The dedication and collective efforts of staff, stakeholders, and community partners have been instrumental in driving positive change and shaping the future of our organization.

Dauphin County Prison

Internal Affairs Policy Overview

Scope of Investigation: The Internal Affairs policy is designed to address allegations specifically concerning DCP personnel. Allegations involving individuals outside the department are referred to relevant third parties for action.

Maintenance of Public Confidence: The integrity of the DCP is crucial for public trust, and an effective internal affairs process is necessary to investigate and address any misconduct or wrongdoing among personnel.

Timely and Efficient Investigations: Allegations are to be investigated promptly and efficiently to ensure timely resolution within the framework of established policies.

Review and Determination: Investigations are subject to critical review upon completion, with factual determinations made regarding whether violations of directives, policies, or procedures have occurred.

Corrective Action: If misconduct is substantiated, appropriate corrective action is taken, and necessary notifications are made following the investigation.

Overall, the policy underscores the importance of accountability, transparency, and maintaining public trust within the DCP through a rigorous internal affairs process.

Dauphin County Prison Apollo Communications - Recruitment Campaign

Dauphin County Prison’s first ever Recruitment Campaign kicked off on September 1st, 2023, and ran through December 31st of 2023. The team of communications professionals at Apollo Communications worked on a creative concept that emphasized the “heart” and the “head” pieces of the campaign. Dauphin County Prison wants to appeal to prospective candidates who have a spirit of service, who want to give back to their community, and who hold compassion and a desire to help others. We are seeking candidates who want to work with a mission focus and are looking to make a career decision based on practical and logical reasons. Dauphin County Prison offers an excellent benefits package which includes a competitive starting salary, robust healthcare options, a pension plan, generous leave/vacation time, degree incentives, promotional opportunities and more for those who choose to make Dauphin County Prison their career home.

Dauphin County Prison is actively recruiting Correctional Officers, Treatment Specialists, and more. To begin a rewarding career in public service, visit our career page or contact our human resources department today.

Progress Update on Yield Theory Implementation at Dauphin County Prison

Introduction: This report provides a comprehensive overview of the ongoing efforts to implement Yield Theory communication training and develop personal growth programs at Dauphin County Prison (DCP). The primary objective of these initiatives is to cultivate mental strength and resilience among both staff and incarcerated individuals by fostering self-awareness, empathy, and humility.

Initial Impressions: Through the interactions with DCP leadership, staff, and incarcerated individuals' valuable insights have been obtained that speak to the effectiveness of this training. Initial impressions indicate a collective openness to personal development and improvement. DCP leadership has demonstrated genuine commitment to fostering growth, coupled with strong principles and consistent follow-through. Staff, while initially skeptical, have shown remarkable openness to the training content, with the majority embracing the emphasis on personal responsibility and accountability. Similarly, incarcerated individuals have expressed receptiveness to potential program overhauls and implementations, reflecting a favorable attitude towards staff and a willingness to engage with new ideas.

Yield Theory Communication Trainings: An initial two-day Yield Theory communication training has been successfully conducted with DCP staff members. The training aims to equip staff with effective communication skills, conflict resolution strategies, and an understanding of Yield Theory principles. Despite initial resistance from some staff, the overwhelming majority have demonstrated a significant shift in attitude and engagement, with approximately 99% expressing newfound openness and receptiveness to the training content. Interactive workshops, role-playing exercises, and facilitated discussions have encouraged participants to set aside their egos, leading with humility and a commitment to personal growth.

Development of Personal Growth Programs: Efforts have been directed towards assessing the needs and preferences of incarcerated individuals regarding personal growth programs. Ongoing meetings and discussions with inmates have provided valuable insights into the challenges they face and the types of programs that may be most beneficial. These programs will focus on promoting self-reflection, emotional intelligence, and resilience, with the overarching goal of empowering individuals to overcome obstacles and lead more fulfilling lives both during and after their incarceration.

Expected Outcomes: Anticipated outcomes of these initiatives include:

- 1. Improved Communication and Conflict Resolution:** Staff members will demonstrate enhanced communication skills and a greater ability to de-escalate conflicts, fostering a more positive and supportive environment within the facility.

- 2. Increased Self-Awareness and Empathy:** Both staff and incarcerated individuals will develop a deeper understanding of their own emotions and those of others, fostering empathy and compassion in their interactions.
- 3. Enhanced Personal Growth and Resilience:** Through participation in personal growth programs, incarcerated individuals will gain valuable tools and insights to navigate challenges, build resilience, and strive for continuous self-improvement.
- 4. Cultivation of a Positive and Empowering Culture:** The integration of Yield Theory principles will contribute to the creation of a culture characterized by humility, empathy, and a shared commitment to personal and collective growth.

The implementation of Full-Scale Yield Theory training and the development of personal growth programs represent significant steps towards fostering mental strength and resilience among both staff and incarcerated individuals at Dauphin County Prison. By embracing the principles of Yield Theory and prioritizing self-awareness, empathy, and humility, the goal is to create a supportive and empowering environment where everyone has the opportunity to thrive. The first month has been productive, signaling a positive trajectory for future progress.

**FEE FOR SERVICE REPORT
2023**

Fee for Service Comparative Statement

Funds Received	2023	2022	Increase / Decrease	Percentage
Housing	\$99,174.72	\$202,179.67	(\$103,004.95)	-104%
Medical	3,439.25	4,543.46	(\$1,104.21)	-32%
Notary	349.04	795.72	(\$446.68)	-128%
Restitution	3,456.93	3,743.59	(\$286.66)	-8%
TOTALS	\$106,419.94	\$211,262.44	(\$104,842.50)	-99%

INDEPENDENT AUDITOR'S REPORT

Board of Prison Inspectors
Dauphin County Prison
Harrisburg, Pennsylvania

Opinions

We have audited the cash basis financial statements of the Commissary and Inmate Funds of the Dauphin County Prison (the Prison) as of and for the year ended December 31, 2023, and the related notes to the financial statements, which collectively comprise the Prison's basic financial statements as listed in the Contents.

In our opinion, the accompanying financial statements referred to above present fairly, in all material respects, the respective cash basis financial position of the Commissary and Inmate Funds of the Dauphin County Prison, as of December 31, 2023, and the respective changes in cash basis financial position, and, where applicable, cash flows thereof for the year then ended in accordance with the cash basis of accounting described in Note 1.

Basis for Opinions

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Prison, and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Emphasis of Matter - Basis of Accounting

We draw attention to Note 1 of the financial statements, which describes the basis of accounting. The financial statements are prepared on the cash basis of accounting, which is a basis of accounting other than accounting principles generally accepted in the United States of America. Our opinions are not modified with respect to this matter.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with the cash basis of accounting described in Note 1, and for determining that the cash basis of accounting is an acceptable basis for the preparation of the financial statements in the circumstances. Management is also responsible for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinions. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- exercise professional judgment and maintain professional skepticism throughout the audit.
- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Prison's internal control. Accordingly, no such opinion is expressed.
- evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- conclude whether, in our judgment, there are conditions or events, considered in the aggregate, which raise substantial doubt about the Prison's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings and certain internal control related matters that we identified during the audit.

A handwritten signature in black ink, appearing to read "Boyer & Ritten". The signature is fluid and cursive, with a large, sweeping initial 'B' and 'R'.

See Notes to Financial Statements.

DAUPHIN COUNTY PRISON

NOTES TO FINANCIAL STATEMENTS

Note 1. Nature of Activities and Significant Accounting Policies

Nature of Activities: The Commissary and Inmate Funds of the Dauphin County Prison (the Prison) are separate segregated funds of the Dauphin County Prison. The Commissary Fund was founded in June 1956, to receive commissions from commissary purchases and to buy merchandise to benefit inmates, including library books, computer equipment, sports equipment, etc. The Inmate Fund accounts for the money deposited for each individual inmate that can be used for purchase of items from the commissary.

Funds: The accounts of the Dauphin County Prison are organized into funds, each of which is considered to be a separate accounting entity.

Basis of Accounting: The financial statements are prepared on the cash basis of accounting. Revenues are recognized when cash is received and expenses are recognized when they are paid.

Revenues and Expenses: The funds distinguish between operating and non-operating revenues and expenses. Operating revenues and expenses of the funds consist of site rental payment fees, commissions on charges for services, and contributions to inmate accounts. The costs of providing those services, including depreciation and interest costs are reported as operating expenses. All other revenues and expenses are reported as non-operating.

Use of Estimates: The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

Memorandum Only: Total Columns: The total columns on the combined financial statements are captioned "memorandum only" to indicate that they are presented only to facilitate financial analysis. Data in these columns do not present results of operations in conformity with accounting principles generally accepted in the United States of America nor is such data comparable to a consolidation. Interfund eliminations have not been made in the aggregation of this data.

Cash and Cash Equivalents: For the purpose of the Statement of Cash Flows, cash and cash equivalents include all highly-liquid investments with an initial maturity of three months or less.

Use of Restricted/Unrestricted Net Position: When an expense is incurred for purposes for which both restricted and unrestricted net position is available, the Funds' policy is to apply restricted net position first.

DAUPHIN COUNTY PRISON

NOTES TO FINANCIAL STATEMENTS

Note 2. Cash and Cash Equivalents

Cash and cash equivalents consist of cash on hand and cash at financial institutions with a maturity of three months or less. Cash and cash equivalents at December 31, 2023, are categorized as follows:

	Amount
Uninsured but Collateralized in Accordance with Act 72	\$ 602,078
Plus: Amount Insured by FDIC	250,000
	<u>852,078</u>
Less: Outstanding Checks	(44,635)
Less: Other Reconciling Items	(914)
Plus: Deposits in Transit	12,781
Total Carrying Value of Deposits at Financial Institutions	<u>819,310</u>
Plus: Cash on Hand	500
Total Cash and Cash Equivalents	<u><u>\$ 819,810</u></u>

Custodial credit risk is the risk that in the event of bank failure, the Funds' deposits may not be returned to them. The Funds do not have a policy for custodial credit risk. At December 31, 2023, \$1,697,519 of the bank balance was uninsured, but was covered by collateral held by the pledging bank's trust department according to Act 72. Act 72 of 1971, as amended, is an act standardizing the procedures for pledges of assets to secure deposits of public funds with banking institutions pursuant to other laws; establishing a standard rule for the types, amounts and valuations of assets eligible to be used as collateral for deposits of public funds; permitting assets to be pledged against deposits on a pooled basis and authorizing the appointment of custodians to act as the pledgers of the assets.

Note 3. Commissions

The Commissary has entered into an agreement with a third-party vendor to sell commissary related items to inmates in exchange for a commission in the amount of 37% of gross commissary sales from January to December 2023. During the year ended December 31, 2023, the Commissary earned commissions totaling \$301,879 related to these sales. A significant reduction in these commissions received by the Commissary could adversely affect the operation of the Fund.

Note 4. Subsequent Events

Subsequent events have been evaluated through April 11, 2024, which is the date the financial statements were available to be issued.

Board of Prison Inspectors
Dauphin County Prison
Harrisburg, Pennsylvania

This letter is to inform the Board of Prison Inspectors of Dauphin County Prison (the Prison) about significant matters related to the conduct of our audit as of and for the year ended December 31, 2023, so that it can appropriately discharge its oversight responsibility and we comply with our professional responsibilities.

Auditing standards generally accepted in the United States of America (AU-C 260, *The Auditor's Communication With Those Charged With Governance*) require the auditor to promote effective two-way communication between the auditor and those charged with governance. Consistent with this requirement, the following summarizes our responsibilities regarding the financial statement audit as well as observations arising from our audit that are significant and relevant to your responsibility to oversee the financial reporting process:

Our Responsibilities With Regard to the Financial Statement Audit

Our responsibility under auditing standards generally accepted in the United States of America has been described to you in our engagement letter dated March 4, 2024. The audit of the basic financial statements does not relieve management or those charged with governance of their responsibilities, which are also described in that letter.

Overview of the Planned Scope and Timing of the Financial Statement Audit

We have issued a separate communication regarding the planned scope and timing of our audit and identified significant risks.

Significant Accounting Practices, Including Policies, Estimates and Disclosures

The following identifies the qualitative aspects of significant accounting practices, including accounting policies, accounting estimates and financial statement disclosures which you may wish to monitor as part of your oversight responsibilities of the financial reporting process:

Preferability of Accounting Policies and Practices

Under the modified cash basis of accounting, which is a basis of accounting other than accounting principles generally accepted in the United States of America, in certain circumstances, management may select among alternative accounting practices. In our view, in such circumstances, management has selected the preferable accounting practices.

Significant Accounting Practices, Including Policies, Estimates and Disclosures (Continued)

Adoption of, or Change in, Accounting Policies

The Board of Prison Inspectors and management have the ultimate responsibility for the appropriateness of the accounting policies used by the Prison. The significant accounting policies used by the Prison are described in Note 1 to the financial statements.

The application of existing policies was not changed during the year. We did not discuss with management any alternative treatments within accounting principles generally accepted in the United States of America for accounting policies and practices related to material items during the current audit period.

Significant Accounting Estimates

Accounting estimates are an integral part of the preparation of financial statements and are based upon management's current judgments. The process used by management encompasses its knowledge and experience about past and current events and certain assumptions about future events. Management has informed us that it used all relevant facts available to it at the time to make the best judgments about accounting estimates, and we considered this information in the scope of our audit.

Management's estimate of these items is based on current and historical information available to management and, in some instances, involved actuarial calculations. We evaluated the key factors and assumptions used to develop the estimates and determined that they are reasonable in relation to the financial statements taken as a whole.

Financial Statement Disclosures

The financial statement disclosures are objective, consistent and clear.

Significant or Unusual Transactions

We did not identify any significant or unusual transactions or significant accounting policies in controversial or emerging areas for which there is a lack of authoritative guidance or consensus.

Audit Adjustments

There were no audit adjustments made to the original trial balances that were presented to us to begin our audit.

Uncorrected Misstatements

We are not aware of any uncorrected misstatements other than misstatements that are clearly trivial.

Disagreements with Management

We encountered no disagreements with management over the application of significant accounting principles, the basis for management's judgments on any significant matters, the scope of the audit, or significant disclosures to be included in the financial statements.

Consultations with Other Accountants

We are not aware of any consultations management had with other accountants about accounting or auditing matters.

Significant Issues Discussed with Management

No significant issues arising from the audit were discussed with or were the subject of correspondence with management.

Significant Difficulties Encountered in Performing the Audit

We did not encounter any difficulties in dealing with management during the audit.

Shared Responsibilities: AICPA Independence

The American Institute of Certified Public Accountants (AICPA) regularly emphasizes that auditor independence is a joint responsibility and is managed most effectively when management, audit committees, and audit firms work together in considering compliance with AICPA independence rules. For Boyer & Ritter LLC (B&R) to fulfill its professional responsibility to maintain and monitor independence, it is essential that management, those charged with governance and B&R each play an important role.

Our Responsibilities

- AICPA Rules require independence both of mind and in appearance when providing audit and other attestation services. B&R is to ensure that the AICPA General Requirements for performing non-attest services are adhered to and included in all letters of engagement.
- Maintain a system of quality management over compliance with independence rules and firm policies.

The Prison's Responsibilities

- Timely inform B&R, before the effective date of transactions or other business changes, of the following:
 - New affiliates, directors, officers.
 - Changes in the organizational structure or the reporting entity impacting affiliates such as partnerships, related entities, investments, joint ventures, component units, jointly governed organizations.
- Provide necessary affiliate information such as new or updated structure charts, as well as financial information required to perform materiality calculations needed for making affiliate determinations.
- Understand and conclude on the permissibility, prior to the Prison and its affiliates, officers, directors, or persons in a decision-making capacity, engaging in business relationships with B&R.
- Not entering into arrangements of non-audit services resulting in B&R being involved in making management decisions on behalf of the Prison.
- Not entering into relationships resulting in close family members of B&R covered persons, temporarily or permanently acting as an officer, director, or person in an accounting, financial reporting, or compliance oversight role at the Prison.

Significant Written Communication Between Management and Our Firm

We have requested certain representations from management that are included in the management representation letter dated April 11, 2024.

Closing

We will be pleased to respond to any questions you have about the foregoing. We appreciate the opportunity to continue to be of service to Dauphin County Prison.

This report is intended solely for the information and use of the Board of Prison Inspectors and management of Dauphin County Prison and is not intended to be, and should not be, used by anyone other than these specified parties.

A handwritten signature in cursive script, reading "Boyer & Ritten". The signature is written in black ink and is centered on the page.

WARDEN'S YEAR-END MESSAGE

2023

Gregory C. Briggs, Warden

Introduction:

As we conclude the year 2023, I am pleased to present a summary of key developments and achievements at Dauphin County Prison. This year has been marked by a concerted effort to enhance operational efficiency, bolster emergency response capabilities, and strengthen partnerships with external stakeholders.

Audits, Inspections, and Transparency:

The year commenced with a heightened focus on audits, inspections, and facility tours, underscoring our commitment to transparency and accountability. We welcomed increased scrutiny from regulatory bodies such as the Department of Corrections and the National Commission on Correctional Health Care (NCCHC). I am proud to report that Dauphin County Prison achieved exemplary ratings in both assessments, with a perfect 100 percent rating in the Title 37 inspection and a commendable 98 percent compliance in the NCCHC audit. These achievements are a testament to the dedication and expertise of our staff, who demonstrated exceptional knowledge and proficiency during the inspections.

Enhanced Tours and Transparency:

In partnership with the Prison Society, we have enhanced the frequency and scope of tours conducted throughout the facility. These tours provide valuable insights into our operations and foster greater transparency with the public. By opening our doors to visitors, we aim to build trust and promote understanding of our mission to ensure safety, security, and rehabilitation within the correctional system.

Special Operations Teams:

We have solidified and revitalized our special operations teams to better address emergent situations within the facility. The Fire Suppression Team has undergone significant enhancements, with three members obtaining EMT certification. This additional skill set will bolster our response capabilities and contribute to saving lives in medical emergencies. I extend my gratitude to Lieutenant Armermann and Sergeant Jordan for their leadership in driving these initiatives forward.

The Corrections Emergency Response Team (CERT) has also been revitalized, thanks to the dedication and training efforts of Lieutenant Skelton, Lieutenant Shay, and the team members. Their readiness and preparedness will ensure a safer environment for both staff and inmates during emergencies.

Accreditation of CISM Team:

In a significant milestone, our Critical Incident Stress Management (CISM) team has become the first accredited team in the state, certified by the International Critical Incident Stress Foundation. Under the guidance of Officer McClurg, the team underwent enhanced training and successfully passed the certification process. This accreditation reaffirms our commitment to supporting the mental health and well-being of our staff following critical incidents.

Navigating Staff Shortages:

One of the significant challenges we encountered in 2023 was the ongoing issue of staffing shortages across various departments within the prison. Despite being short-staffed, our Treatment department has admirably continued to provide essential services and support to the inmate population. Their dedication and resourcefulness have ensured that the necessary needs of inmates are met, contributing to their rehabilitation and overall well-being.

Security Staff Dedication:

Our security staff have exemplified unwavering dedication and professionalism, answering the call to duty without hesitation. Despite facing increased demands and pressures, they have maintained vigilance and upheld the highest standards of safety and security within the facility. Their resilience in the face of adversity is truly commendable and has been instrumental in maintaining order and control.

Maintenance Team's Commitment:

The Maintenance team has been tasked with the challenging responsibility of managing and maintaining an aging infrastructure within the prison. Despite the inherent difficulties associated with this task, they have remained diligent and resourceful in their efforts to address maintenance issues and ensure the smooth functioning of essential systems. Their dedication to their work is evident in the ongoing upkeep and improvement of our facilities, despite limited resources.

Gratitude to All Staff:

I extend my sincerest gratitude to all staff members at Dauphin County Prison for their unwavering commitment, resilience, and professionalism in the face of adversity. Your dedication to our mission and unwavering determination to "get things done" despite challenges are truly commendable. It is through your collective efforts and tireless dedication that we have been able to overcome obstacles and continue to fulfill our duty to serve the community.

Conclusion:

The year of 2023 has been characterized by notable achievements and advancements across various facets of our operations at Dauphin County Prison. I extend my heartfelt appreciation to all staff members for their unwavering dedication, professionalism, and commitment to excellence. As we look toward the future, let us continue to build upon these accomplishments and strive for even greater success in fulfilling our mission.

PERSONNEL REPORT

2023

Danielle Thomas, Human Resources Manager

Personnel Overview:

In 2022, the Dauphin County Prison Board and Board of Commissioners created a new Director of Criminal Justice position as the new vision for the former Director of Corrections position. The vision for the Director of Criminal Justice position was to create an executive administrator to lead the Dauphin County's criminal justice efforts through the development and implementation of policies, programs, and rehabilitative initiatives and the administration of business and fiscal operations. The Director of Criminal Justice would also work directly with partner affiliates of the Dauphin County criminal justice system. In February 2023, Director John T. Bey joined the County workforce and assumed the role.

Dauphin County Prison also created its first ever Internal Affairs Investigator to ensure the integrity of the department is maintained by investigating incidents of misconduct to determine whether departmental policies and procedures have been violated. The IA Investigator would also evaluate Dauphin County Prison practices to make enhancement recommendations and administrative operational changes to prevent future violations.

In 2023, the Prison created several new positions in multiple departments including a Grievance Coordinator, an Accreditation Compliance Manager, and two Reentry Navigators. The Grievance Coordinator position was created in our Treatment Department to investigate grievances, coordinate with staff and inmate populations to resolve non-criminal in-house matters, and implement corrective actions to enhance engagement and streamline the process for addressing internal complaints. The Accreditation Compliance Manager was created within the Administration team to provide administrative, analytical, and professional assistance to update and develop policies and procedures that demonstrate Dauphin County Prison's compliance with and adherence to standards established by the American Corrections Association (ACA), Title 37, Chapter 95 of the Pennsylvania Code, and all other governing statutes. Recruitment for these positions began in 2023 and resulted in one (1) internal promotion and one (1) tentative offer.

In late 2023, Dauphin County Prison also created two (2) new Reentry Navigator positions, which are initially funded by Comprehensive Opioid, Stimulant, and Substance use Program monies awarded by the federal government. By the end of 2023, the facility was still actively recruiting for the Reentry Navigator positions and has since begun interviewing prospective candidates. Recruitment efforts are still underway to fill the Reentry Navigator positions and several other vacancies, including Correctional Officer, Treatment Specialist, and Maintenance Worker. Dauphin County Prison continues to strive to fill vacancies, reduce overtime, and improve the overall quality of life for staff. Human Resources at Dauphin County Prison is confident that we will see progress and owes a lot of the success experienced so far to the 2023 wage increases, which helped retention efforts, and increases to the starting rate for Correctional and Treatment staff.

In 2023 we hired the following number of employees to assist in improving staffing levels:

Security:	26
Treatment:	8
Maintenance:	2
Diversion:	2
Administration:	5

While 2023 had some success recruiting new hires for all departments within the prison, there were separations including retirements, resignations, involuntary resignations, and terminations. There was an increase in retirements within the security department that led to the loss of both long-time employees and staff with vast experience and knowledge.

In 2023 we had employees separate for the following reasons:

Involuntary Resignations:	0
Retirements:	8
Resignations:	35
Terminations:	17

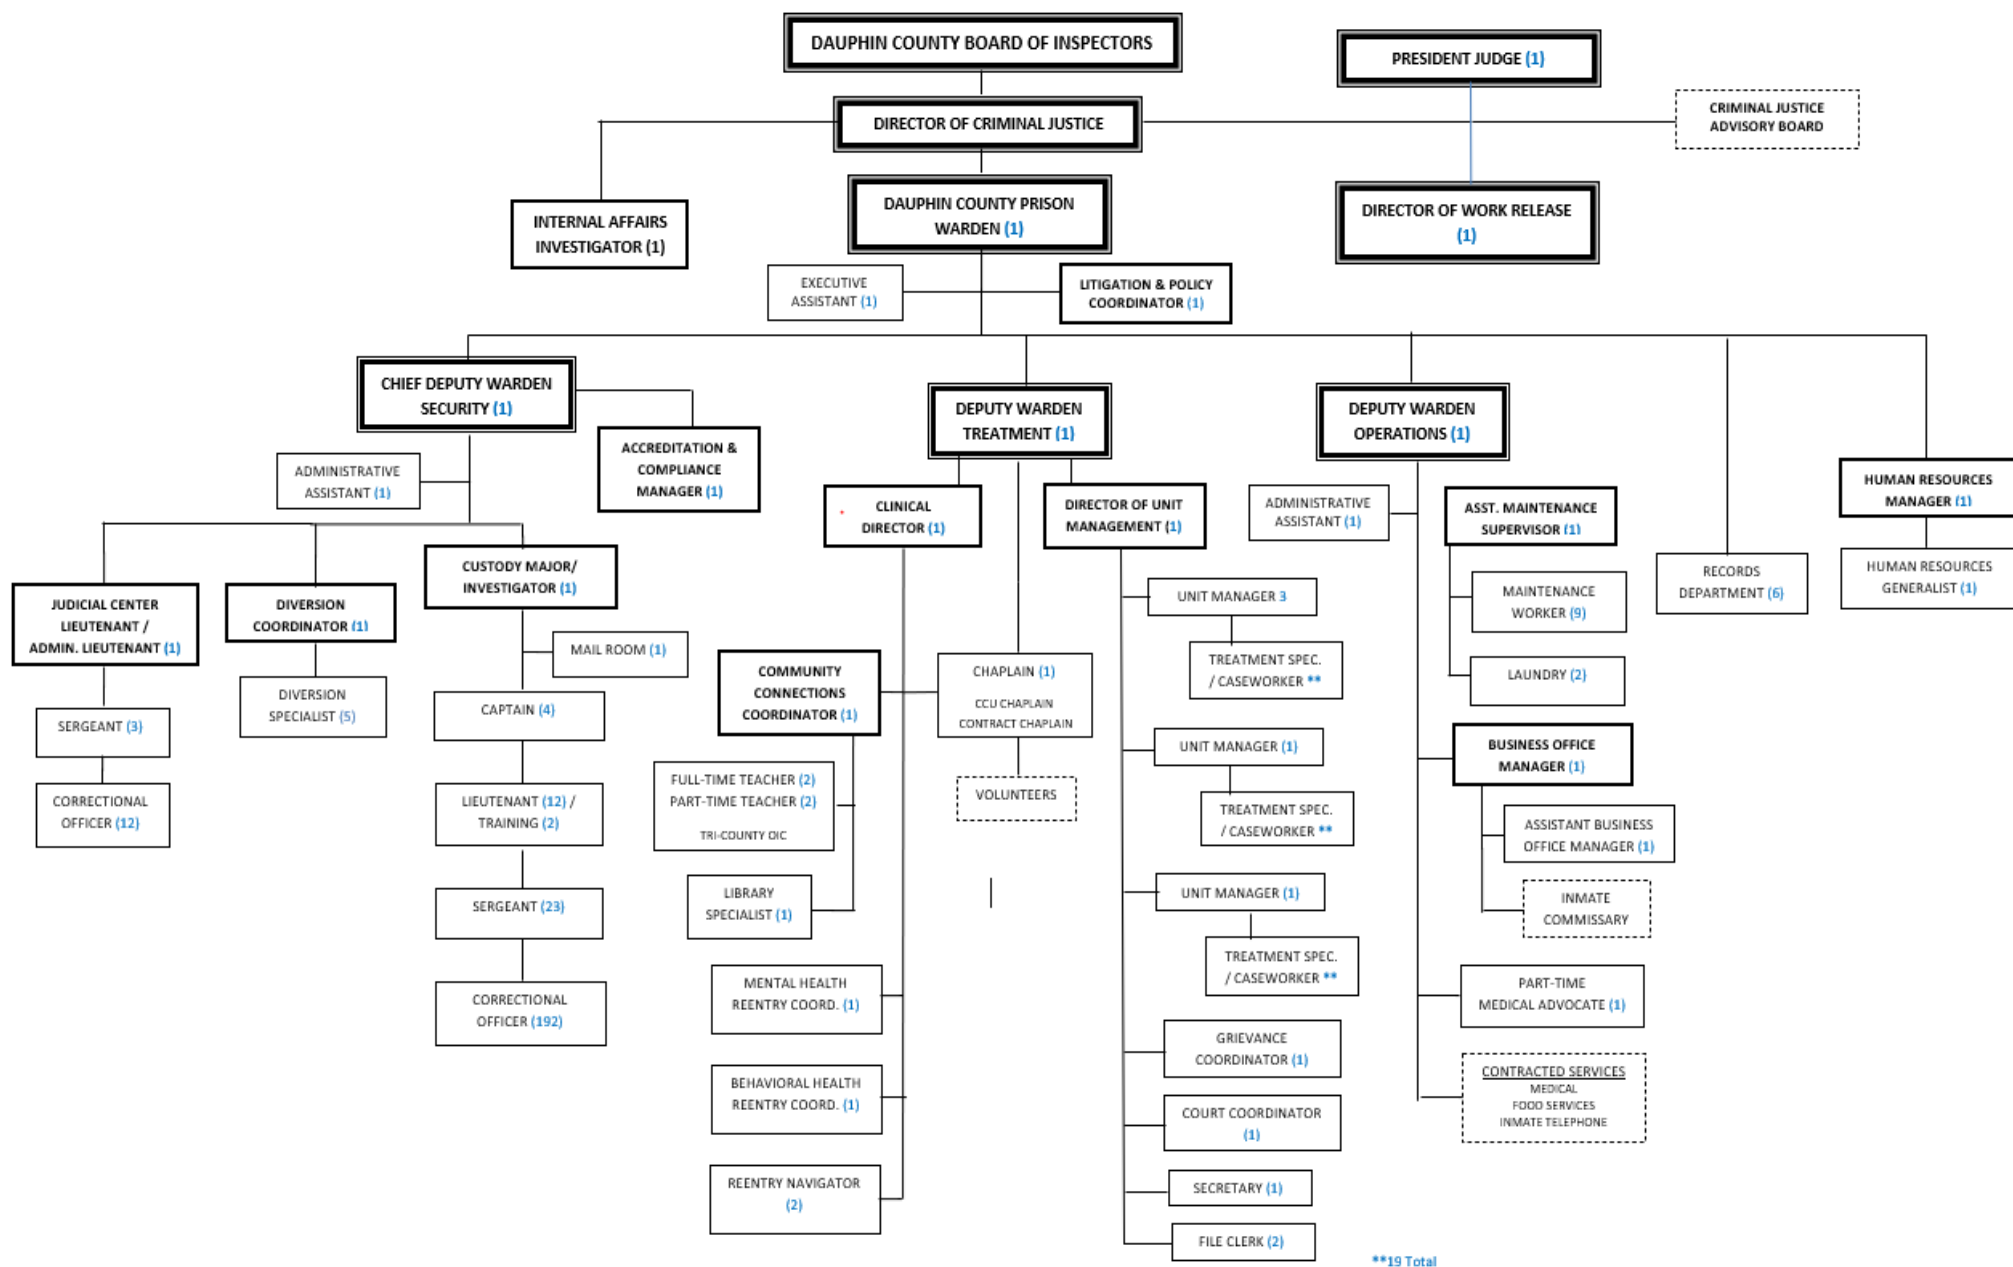

Community Engagement & Recruitment

Dauphin County Prison staff has continued to make strides in community engagement opportunities throughout Dauphin County in an effort to bolster recruitment and develop a more harmonious relationship with the community. Dauphin County Prison Staff attended National Night Out events throughout Dauphin County and held tables at various community events throughout the year to engage the community and encourage residents to apply for positions within the facility. One of the main areas of focus for Prison Human Resources staff was recruitment. Dauphin County Prison Human Resources and staff members from our various departments collaborated with County HR and attended various hiring and recruiting events held at auditoriums, colleges, and facilities throughout the Commonwealth of Pennsylvania.

Supplemental Training Opportunities:

The training department at Dauphin County Prison offers a robust category of essential and informative training, most of which is required for all staff. Several staff members also pursued supplemental training by attending conferences, workshops, webinars, and instructional courses. There were over 30 supplemental training events that staff were able to attend to develop professionally and gain a better knowledge and understanding of best practices in the corrections field.

In closing, most of the above-mentioned accomplishments would not have been possible without the support of the staff who volunteer to attend recruitment events, pursue training opportunities, and devote their time and talents to Dauphin County Prison. We would also like to thank Warden Briggs, Director Bey, and the Dauphin County Prison Board for their continued support and leadership.

Year-End Message

2023

Lionel Pierre, Chief Deputy Warden of Security

As we approach the end of another challenging year in corrections, I want to express my gratitude and appreciation to the Dauphin County Prison staff for their unwavering dedication and commitment to ensuring the safety and security of our facility.

Our staff has demonstrated remarkable resilience and professionalism throughout the past year despite numerous obstacles and uncertainties. Despite the inherent challenges of our profession, you have remained steadfast in your resolve to uphold the highest standards of safety, integrity, and service.

As Chief Deputy Warden of Security, I am continually impressed by the diligence, teamwork, and unwavering dedication displayed by the Dauphin County Prison staff. Their tireless efforts have not gone unnoticed, and I want to extend my sincere thanks for their hard work and dedication to our mission.

Looking ahead to the new year, I am confident that we will continue to overcome whatever challenges may arise and emerge even stronger and more resilient than before. While the road ahead may be difficult, I do not doubt that our continued collective commitment to excellence and our shared sense of purpose will see us through.

I welcome the opportunities and challenges of the year ahead; let us take a moment to reflect on our accomplishments, celebrate our successes, and reaffirm our commitment to serving our community with professionalism, compassion, and integrity.

Use-of-Force Statistics:

Dauphin County Prison Administration continues to collect and study use-of-force data to implement more robust policies and to identify the effectiveness of our current training programs. The data review also fosters more informed conversations around our use-of-force incidents and demonstrates our commitment to transparency, fair and impartial execution of our duties, and community trust. Included in this report are the use-of-force statistics for 2023 that were reported at the monthly Prisons Board meetings.

In response to feedback and with the aim of enhancing readability and comprehension of the reported data for the year 2023, adjustments have been made to the graphical representation accompanying this report. The modifications were implemented to facilitate a clearer understanding of the numbers presented, thereby aiding stakeholders in their analysis and decision-making processes.

The changes incorporated into the graph design have been specifically tailored to streamline the visual interpretation of the data, ensuring that key insights are more readily discernible. By optimizing the graphical presentation, we endeavor to provide a more intuitive and accessible means of conveying the information contained within the report, thereby enhancing its overall effectiveness as a communication tool.

It is our commitment to continuously refine and improve the presentation of data to best serve the needs of our audience. We welcome any further suggestions or feedback regarding the graphical elements of this report, as we strive for ongoing excellence in information dissemination.

It is important to note that the reported numbers for the year 2023 reflect a deliberate refinement in our methodology for capturing data pertaining to disruptive behavior. Specifically, the threshold for inclusion has been adjusted to encompass a broader spectrum of incidents, irrespective of their severity. As a result, the reported figures may appear higher than in previous reporting periods.

This adjustment was made in recognition of the significance of all instances of disruptive behavior, regardless of their individual severity levels. By adopting a more inclusive approach to data collection, we aim to provide a more comprehensive overview of the landscape of disruptive incidents within the scope of our reporting.

It is our belief that this modification in reporting criteria offers a more accurate and holistic representation of the challenges and trends observed within Dauphin County Prison. We remain committed to transparency and integrity in our reporting practices, and we welcome any inquiries or clarifications regarding this adjustment.

SECURITY

Training Report

2023

Kasey Sharp, Training Officer

In this past year's review, it has been highlighted that accomplishments are attainable only with an array of cooperation from a wide variety of departments. I wish to extend my gratitude and appreciation to our Prison Administration, my fellow Training Officer Tim Manwiller, Adjunct Instructors, Department Heads, and Support Staff because without their help, guidance, and support it would have been immeasurably difficult to complete all required training standards. As a department, we remain focused on assisting our staff to better themselves and our institution as well as helping to tackle our staffing issues to make our facility safer.

Our highest priority has been to continue to raise the bar for our staff's performance, along with keeping our department accountable with a focus on our core values. We strive to remain professional, fair, honest, and ethical role models. We continue to be transparent in our sharing of information related to DCP's mission and strive to always show compassion towards the community, the residents, and the staff. We encourage everyone to make good choices to improve the safety and security of each person that walks into our facility. We strive for excellence every day by inspiring each other to be the best people we can be and to take pride in the important work that we all do. Each department, with all its staff, plays a significant role in creating an environment where we are one team, celebrating our successes and goals with a determination to deliver the best possible results for our staff and our community.

Throughout the year, all staff received a multitude of trainings to include Key Control, Prison Emergency Plans, Suicide Prevention and Intervention, Fire Safety Education, and the Prison Rape Elimination Act (PREA). Prison Security staff received trainings on: AXON Body Worn Camera policy and procedure, Sexual Harassment, Documentation and Report Writing, Inmate Count, Use of the Restraint Chair, and qualified on-duty weapons. Seven groups of Correctional Officer trainees completed a 160-hour Basic Training Academy. Newly hired staff were certified in American Heart Association (A.H.A.) Heart Saver with Automated External Defibrillator (A.E.D.), and Basic First Aid. In 2024, everyone working in the Prison will be re-certified with these important life-saving skills from the A.H.A. to remain in compliance with the 2-year A.H.A. required certification. We completed New Employee Security Orientations for newly hired Correctional staff, as well as non-security staff from the following departments: Administration, Treatment, Maintenance, Medical, Food Service, Phone and Tablet Service, Commissary, and Diversion. Newly hired staff from the Administration, Treatment, Maintenance, Diversion, and the Dauphin County Work Release Center attended our two-week Basic Training Academy. Newly hired staff also received the County-required training on Van Roll-Over Prevention and Safety Data Sheet. On average, our Security staff attended a total of 25 hours of training, and our support staff received a total of 12 hours of training in 2023.

The Fire Suppression Team (FST) added six (6) new members to their team this past year. The team maintained their Emergency Medical Technician (EMT) status and had three of their new

members complete the EMT course to gain their certification. These officers provided A.H.A. Heart Saver, A.E.D., and First Aid training to Prison staff and other agencies. In addition, members of the team assisted during Basic Orientation classes and served as Adjunct Instructors for Prison staff during Fire Safety, Suicide Prevention and Interventions, and PREA. They also took on supplementary responsibilities in running fire drills and maintaining our A.E.D.'s and fire extinguisher maintenance.

The Critical Incident Stress Management Team (CISM) added four (4) new members to their team this past year. Members of this team assisted during Basic Orientation classes and served as Adjunct Instructors for Prison staff during PREA, Emergency Plans, Key Control, and Inmate Count trainings.

In 2023, our Treatment Department created a positive link with Dauphin County's Probation and Parole Adult Division to provide a Trauma Informed Care course to our staff. This provided another tool to better serve our inmate population while in our care. This training will be offered to all departments over the next year.

This past year we kept our connections with Dr. Christian Conte, who is one of the country's most accomplished mental health specialists in the field of anger and emotional management. Dr. Conte is one of only a handful of people who have level V anger management certification, the highest level possible. He is the creator of "Yield Theory," which is a powerful approach to change, combining radical compassion with conscious education for the effective treatment of anger issues. He trains correctional institutions, sports teams, and organizations in the practical application of his Yield Theory Anger Management Program. We were very fortunate to work closely with him, continuing to adapt his YIELD Theory training in relation to de-escalation techniques utilized in our facility. Dr. Conte also took the lead in a leadership session for our administrators, department heads, and supervisors to help them better our connections and communications with staff. This was extremely important in our journey to achieve our goals and objectives while remaining vigilant in becoming the best version of us within the correctional setting.

The Training Department stays busy with duties outside of the classroom by assisting with curriculum development, record-keeping, policy review and recommendations for revisions, coordination of prison tours, monthly inventories of equipment and supplies, and maintenance of equipment, as well as the purchasing and distribution of new equipment. I, along with my fellow training officer Tim Manwiller and Lieutenants Richard Armermann and Mark Skelton, attended a sixteen-hour training course in Pressure Point Control techniques to be able to pass more knowledge on to our staff. Over the next year, we as a department are committed to remaining focused on providing the best and most successful trainings while we collaborate and network with others in our field as we recognize that it takes a village to serve professionally and proudly to improve our community of staff, inmates, and the public one step at a time.

SECURITY

Diversion Report

2023

Michael Keefer, Diversion Coordinator

Staffing:

The full staffing is comprised of one (1) Diversion Coordinator and four (4) Diversion Specialists. The Diversion team operates 7 days per week from 6 am – 11 pm.

Like most departments, staffing issues impacted Diversion throughout the last couple of years. In early January of 2023, two (2) Diversion Specialists were hired. Diversion Specialist Lewis Rodriguez joined the team in 2022. In 2023, the Diversion team grew when Diversion Specialist Summer Billow began employment on January 23, 2023. Diversion Specialist Langley Pranke joined the team on March 6, 2023, and Michael Keefer assumed the role of Diversion Coordinator on April 23, 2023. The team operated with one (1) vacancy until July 24, 2023, when former Treatment Specialist Gabriella Van Lier transferred to Diversion as a Diversion Specialist. Since then, the Diversion Department has remained fully staffed.

Data:

In 2023, 1,650 risk assessments were completed. The following data was collected during 2023.

Behavioral Health Screens	
Drug & Alcohol Screens	1,687
Mental Health Screens	1,728
Gambling Screens	512
Total Behavioral Health Screens	3,927

Treatment Needs & Referrals	
Mental Health	382
Drug & Alcohol	306
Referrals to CMU	220
Referrals for D&A Evaluations	195
MISA Referrals	218
Total Referrals	633

Outcomes	
Released to DCP	875
Released to the Community	888
Released to the Community w/ Treatment Recommendations	148
Follow-ups Completed	88

Updates:

In May 2023, Diversion Specialists began entering notes into OMS for individuals screened at the Judicial Center that will be incarcerated at DCP. This is being done to ensure that DCP staff have access to updated information regarding individuals being incarcerated at DCP.

In June 2023, Diversion Specialists began completing the TCU five (5) Drug Screen to inmates in DCP that were intoxicated or had refused screenings at the Judicial Center. If the individual meets the criteria for a D&A evaluation, referrals are made on their behalf.

In July, the Intake, Recommendation, and 72hr Follow-Up forms were updated.

In August and September, two (2) Quality Assurance Indicators were developed.

1. Referrals for treatment are appropriately linked to the TCU 5 Drug Screen & MH Screen.
2. Documentation for individuals being transferred to DCP from the Judicial Center will be entered into OMS within 4 days of the transfer.

These indicators were then reviewed during the months of October, November, and December to develop a baseline of the performance for these measures. Additional indicators have begun to be developed and monitoring will begin in 2024.

New staff completed their orientation training, and all staff completed all required yearly Dauphin County Prison training. In May 2023, Diversion Specialists attended the Dauphin County Drug & Alcohol Conference. Topics included What We Learned from the Legalization of Marijuana, Understanding and Learning from Challenging Behavior, Engaging Veterans in Substance Use Disorder Treatment, Using Mindfulness to get Through the Day, Co-Occurring Disorders: Gambling, Mental Health & Substance Use, Family Centered Recovery, How to be Connected: Improving Engagement, and Drug Awareness: Prevention & Trends.

Several Diversion staff attended a 2-day Yield Theory training course on de-escalation and effective communications held by Dr. Conte. Several Diversion Specialists completed the 40-hour CIT training provided by the Dauphin County District Attorney's Office.

Central Booking Data - 2023

Mission Statement

The Dauphin County Judicial Center promotes firm, fair and consistent practices and procedures that maximize the safety of the community, staff and detainees in custody while maintaining transparency and communication with the community we serve.

TREATMENT DEPARTMENT

Deputy Warden
Latonya S. Ray

TREATMENT

Year-End Message

2023

Latonya Ray, Deputy Warden of Treatment

The Treatment Department is committed to enhancing opportunities for improved outcomes for residents at Dauphin County Prison. Our goal is to enhance all facets of treatment and advance our vision of a Reentry Services department that expands to involve community partners seamlessly, both inside and outside the prison walls. We are dedicated to bridging the gap between resources and the individuals we serve, and our community partners continue to collaborate with us to ensure continuity of services upon release. We maintain strong relationships with organizations such as Career Link, Tri-County Opportunities Industrial Centers of America (OIC), Gaudenzia, Community Services Group (CSG), and Geo Group to achieve the best possible outcomes while also seeking new resources.

Under the direction of our Director of Unit Management and with the dedication of Treatment Specialists, we continue to provide case management services coupled with our newly implemented Vantage Needs Assessment. Needs Assessments allow us to assess the needs of our population and initiate referrals more accurately for services while ensuring day-to-day case management services are provided. Our dedicated team of Treatment Specialists play a crucial role in identifying the needs of our population through Initial Intake and Needs Assessments. These assessments enable specialists to recommend appropriate programs and initiate referrals for services such as alcohol and drug evaluations.

Under the direction of our Community Connections Coordinator, we continue our efforts to work closely with community organizations to present new opportunities for strengthening the relationship between residents and organizations invested in reentry coordination.

Our Educational Department, consisting of Central Dauphin County Teachers and two part-time teachers funded by the Adult Educational Grant, provides opportunities for educational advancement through classroom instruction and High School Equivalency Testing (HiSET).

Our drug and alcohol programming, provided by Gaudenzia, includes individual and group counseling sessions, along with opportunities to apply learned behaviors in a structured setting. Gaudenzia not only offers services akin to Intensive Outpatient Therapy but also assists residents in transitioning to the community through program location and completion of necessary referrals for continued treatment post-incarceration.

One persistent challenge in successful re-entry is the shortage of housing and transportation resources for individuals returning to the community. We address this by partnering with organizations like Bro2Go and Breaking the Chainz to provide housing and transportation assistance. Additionally, we continue to offer bus passes and aid in locating suitable housing for those in need.

Recognizing the urgent need for a shift in attitudes among both staff and residents, we are actively working on this challenge by partnering with county agencies to offer comprehensive, evidence-based training to all personnel. In 2023, 17 staff members at Dauphin County Prison underwent Trauma-Informed Care Training. As we forge ahead, our dedication extends to exploring new and innovative methods to transform our procedure by working collaboratively with various county agencies and following best practice standards. This collective endeavor is aimed at fostering enduring change in both our residents and staff.

TREATMENT

Casework & Counseling Report

2023

Jill Cuffaro, Director of Unit Management

Overview:

Treatment Specialists conducted hundreds of Casework Orientations and intakes last year, both of which evaluations are vital for residents' acclimation to the prison environment. During orientation, they receive block schedules, program information, and develop personalized treatment plans. Residents also attend various groups and counseling sessions, facilitated by Treatment Specialists, tailored to their needs. Additionally, Treatment Specialists assist in communication with outside agencies and collaborate with mental health staff for residents' well-being. The team welcomed new specialists, enhancing our ability to support residents effectively.

Classification:

Our classification process is a systematic assessment and categorization of residents based on factors such as current offense, prior offense, behavior, risk level, and identified needs accomplished through utilization of an objective classification process. This process is crucial in determining suitable housing assignments, security/custody levels, program eligibility, and supervision necessary to ensure the safety and well-being of residents, volunteers, visitors, and staff.

Secretarial and Support Staff:

Our Treatment Department clerical team remains the department's cornerstone, handling vital tasks such as meticulously entering data for nearly 1,000 active resident files, managing both active and inactive files, activating and deactivating files for newly committed or released individuals, documenting program participation, and responding to telephone and email inquiries throughout the year.

Casework / Counseling:

Last year, Treatment Specialists facilitated hundreds of Casework Orientations and intakes. These orientations, typically conducted within the first 5-7 days of a resident's arrival to their designated housing block, are vital for acclimation to the prison environment. During orientation, residents receive block schedules, learn about available programs, and review essential case working protocols. They also have the opportunity for private discussions with their assigned treatment specialist to initiate development of a personalized treatment plan and address any immediate concerns. Treatment plans are tailored to each individual by assessing their treatment needs based on information gathered during orientation and intake sessions. While orientation primarily focuses on housing block rules and procedures, treatment specialists also conduct intake sessions with residents, delving into their past and present criminal history, behaviors, and substance abuse issues.

When the treatment plan is completed, residents have the opportunity to attend Violence Intervention, Support Skills, Addictive-Compulsive Behaviors, Moral Reconciliation Therapy

(MRT), and Drug and Alcohol groups led by GEO group. Due to the evolving needs of residents, new groups have been added: “Empowerment to Lead” with One Vote Counts, “Helping Individuals Succeed” with Derrick James, and “Writing Letters with Dad” with Derra Brown. Volunteer-led groups consist of Bro2Go, Breaking the Chainz, Narcotics Anonymous, Alcoholics Anonymous, Domestic Violence, and religious groups. Treatment Specialists facilitate about 5 groups per week. They also conduct individual counseling sessions and provide clinical assignments if needed.

Treatment Specialists process hundreds of resident request slips, document request slips, and provide residents with the appropriate forms to communicate with outside agencies. In addition, treatment staff provide valuable input regarding the needs of our mental health population through daily meetings with Prime Care mental health staff. Treatment Specialists have assisted in keeping residents in contact with their attorney and all outside agencies that request communication with a resident. We have also teamed up with the Dauphin County Public Defender’s office to create Attorney Day, where Public Defenders come into the prison to meet with a specific housing block and spend time talking to their clients one-on-one to ensure proper communication and assistance is met. We provide Spanish translation services (for counseling and casework purposes), as well as Spanish Support Skills and Moral Reconciliation groups in Spanish conducted by a bilingual treatment specialist.

The Deputy Warden of Treatment and Director of Unit Management successfully hired and onboarded six new treatment specialists who bring a diverse range of skills and experiences to our team. We are confident that these additions to our team will contribute significantly to the overall well-being and rehabilitation of individuals under our care. The three Unit Managers oversee the resident trustee program by assigning job details and resident classification, as well as providing disciplinary oversight to ensure fair treatment and appropriate sanctions.

Therapeutic Communities:

During the past year, we continued to operate a Therapeutic Community for females. J-Block is a Relapse Prevention Therapeutic Community that teaches the tools to challenge the negative behaviors, actions, and feelings that can trigger addiction. We also currently offer the Gaudenzia program block for men. The program is evidence-based and similar to an Intensive Outpatient model with regular group therapy, which will also focus on discharge planning.

Staff Training:

All treatment staff were trained in Dr. Conte’s Yield Theory about communication and Trauma Informed to better assist in dealing with the resident population as well as trained in MRT (Moral Reconciliation Therapy). Staff were also trained in CPR/First Aid, PREA, Suicide Prevention, Fire Safety, and key control.

Resident Worker Program:

In 2023, the average number of resident workers per day was approximately 75 (4 of which were female), with about half of those residents working in the kitchen. Typical job assignments include kitchen work, painting, cleaning details, laundry, landscaping, snow removal, and trash removal.

Parole / Restrictive Probation:

Reentry as a means of reducing a sentence is still in operation with Judges sometimes issuing an order for placement in reentry programming, at the time of sentencing.

In mid-March of 2023, Probation/Parole assumed the responsibility of reviewing a resident's eligibility for parole. Before that time in 2023, DCP was responsible for the processing of 53 parole applications. Each parole application summarizes a resident's behavior and programming in the facility and includes their home plan/housing plan upon release from incarceration. Additionally, a recommendation regarding release is submitted to the Court for consideration.

After mid-March, DCP submitted 87 Institutional Adjustment letters to the Work Release Center for processing in 2023. These letters include behavior reports, along with program completion and participation reports.

Work Release Center (WRC) Transfers:

Residents who are already incarcerated are regularly transferred to the Work Release Center. 492 residents were transferred to the WRC from DCP in 2023, an average of 41 per month.

TREATMENT

Community Connections Report

2023

Janine Rawls, Community Connections Coordinator

Community Connections/Reentry:

Reentry Resource Fairs continue to provide in-person opportunities for residents to connect with agencies that provide vital services in the community.

In 2023, three Reentry Resource Fairs were held on the following dates:

January 10, 2023 – 56 Residents attended

April 4, 2023 – 75 Residents attended

August 22, 2023 – 56 Residents attended

190 of our residents were able to attend all three fairs, and 10 connections of care were able to be created. Each quarter we will attempt to have a Reentry Resource Fair. Currently, for the year of 2024, the first Reentry Resource Fair is scheduled for February 6, 2024.

The Behavioral Health Reentry Coordinator created 23 Reentry Plans starting April 3, 2023, and continuing until November 22, 2023. Three of the plans that were implemented resulted in the residents returning to Dauphin County Prison within 60 days. Not all plans have been able to be implemented due to most residents still being in different stages of the Criminal Justice System.

Reentry Presentation:

In November 2022, Dauphin County Prison began Reentry Presentations. Reentry Presentations are informational sessions about different agencies in Dauphin County and surrounding counties. It is a way for the agencies to come into DCP, meet with our residents, and share the services that their agency can provide. All agencies focus on the seven reentry needs of the reentrant, which include Employment and Education training, Civic and Community Services, Legal, Housing, Physical and Behavioral Health, Basic Needs, and Family. The Reentry Presentations are also a way for our residents to know where to go once released from DCP. The following agencies have participated in Reentry Presentations in 2023:

- Time Done
- Bethesda Men's Mission – Men's Christian Recovery Programs
- Center for Employment Opportunities – Work Force Development
- SOARS/OIC – Reentry Program for youths 18-24 and older adults over age 25.
- PA Career Link – Job development
- Dauphin County Probation and Parole
- Dauphin County Children and Youth Services

- Dauphin County Public Defenders
- Dauphin County Drugs and Alcohol
- Dauphin County Work Release
- Pennsylvania Recovery Organization Alliance (PRO-A) – Employment services for those in Recovery
- Patty Kim and David Madsen’s Office – Discussing Pardons and Expungements
- YMCA – Male Transitional Housing
- Gaudenzia – Drug and Alcohol Services
- Hamilton Health Center – Case Management and Opioid Use Disorder
- Home Centris – Home Health Aide Services
- Flagger Force – 2nd Chance employment
- Metropolitan Barber Academy – Trade Services
- Jubilee Ministries New Life for Girls – Women’s Christian Recovery Services

Attorney Visits and Legal Services:

In March 2023, DCP initiated discussions with the Dauphin County Public Defender’s Office regarding legal services for our residents. They shared insights into the legal process, including how individuals are assigned public defenders and emphasized the importance of improving communication with residents as their top priority. Following Reentry Presentations, DCP and the Dauphin County Public Defender’s Office collaborated to establish Attorney Day. This event involves the Public Defender’s Office visiting Dauphin County Prison to meet with as many clients as possible, ensuring proper representation and timely case handling. Attorney Day is organized through coordination between Chief Public Defender Mary Klatt and the DCP Community Connections Coordinator (CCC). Every one to two weeks, the Chief Public Defender receives a list of residents from a specific block. After identifying those represented by the PD’s office, the list is returned to the CCC. A day is then selected for 5-7 public defenders to visit DCP and meet with their clients, typically held in one of our gym areas or in the Chapel.

Volunteer Program:

Dauphin County Prison’s volunteer program was able to restart in 2022 after a long pause while agencies and correctional facilities around the world faced COVID-19 and the challenges that a worldwide pandemic brought to operations. Dauphin County Prison was no different and faced many challenges during the pandemic. One of the most impacted areas of the Treatment Department was the ability to work with community partners and volunteers. In 2023, the Treatment Department continued to make strides toward the goal of reimplementing volunteer opportunities. Currently there are 9 groups that volunteer or are contracted to provide services to our residents.

The following groups began working with residents in 2023:

Geo Group (Moral Reconciliation Therapy (MRT) and Drug & Alcohol Education)

Moral Reconciliation Therapy is a form of cognitive-behavioral therapy (CBT) that promotes moral reasoning, better decision-making, and more appropriate behavior. It is based on the idea that risky

and criminal behavior stems from faulty thinking patterns, such as a lack of empathy, distorted perceptions of right and wrong, and impulsivity. MRT aims to address these underlying issues through a structured program that includes group sessions, individual counseling, and homework assignments. Geo Group provides MRT group instruction one day each week in addition to MRT groups facilitated by Treatment Specialists throughout the week. Geo Group provides Drug & Alcohol Education class instruction one day each week as well.

1 Vote Counts (Empowerment to Lead/Civics Engagement 101)

The Empowerment to Lead program is designed to teach empowerment skills and goal planning. Civics 101 is designed to provide Dauphin County Prison residents with the civic knowledge necessary and fundamental for every citizen. 1 Vote Counts also works with the Bureau of Registrations and Elections, along with our Community Connections Coordinator, to coordinate voter registration drives and process absentee voter ballots for Dauphin County Prison residents.

Greater Dad's/ Helping Individuals Succeed (H.I.S.)

The Greater Dad's is a fatherhood program that focuses on characteristics that every father needs and covers the universal aspects of fatherhood so men of all cultures and races benefit. Fathers surveyed before and after completing the program indicated significant improvement in their attitudes and understanding about fathering.

Gaudenzia Drug and Alcohol Therapeutic Program

The Gaudenzia Drug and Alcohol program serves residents of Dauphin County Prison who fit the criteria for participation in outpatient-based substance use services. Programming is led by a dedicated Gaudenzia counselor Monday through Friday. No drug or alcohol diagnoses would exclude appropriateness for Level of Care Assessment to determine needs. Populations currently served are those individuals who have struggled with substance use issues or co-occurring issues that could have been treated in an outpatient setting prior to incarceration. Gaudenzia addresses co-occurring and Medication Assisted Treatment needs with weekly onsite coverage from the appropriate prescriber upon an individual's transition to a community-based outpatient location. As the Harrisburg outpatient services operates within the larger Gaudenzia system, this program serves as a pathway to the overall continuum of care through collaborative reentry planning between Gaudenzia and a plethora of county agencies to include Dauphin County Prison staff, Drug & Alcohol, Dauphin County Work Release, and Adult Probation Services.

Writing Letters with Dad

Writing Letters with Dad is a letter writing program facilitated by Derra Brown which allows dads with school age children an opportunity to enhance their relationships through effective communication through writing letters.

Volunteer Training

Bi-annual security training was offered to volunteers, covering a wide range of topics such as contraband, common problems, women's issues, hostage survival information, understanding the criminal personality, fire safety, and effective ways to work with residents.

Current Volunteer Needs

In our efforts to increase opportunities for religious engagement among our Muslim population, we are currently seeking an Imam available to assist with facilitation of Jumah services.

As always, we welcome any assistance with overcoming all reentry barriers such as assistance with providing transportation upon release from prison, assistance with procurement of stable housing, and successful coordination of treatment services.

TREATMENT

Mental Health Reentry Report

2023

Jessica Hargrove, Mental Health Reentry Coordinator

We work with individuals with an identified mental health diagnosis, who are sentenced or being held on a Dauphin County probation detainer, to create and execute Mental Health Reentry Plans. Reentry Plans are developed through a series of carefully coordinated meetings and exchanges between various county agencies to include Adult Probation, Case Management Unit (CMU), Keystone Intensive Case Management (KICM), Mental Health/Autism/Developmental Disabilities (MH/A/DP), Dauphin County Department of Drug & Alcohol (D&A), the Public Defender's Office (PD), District Attorney's Office (DA), Dauphin County Work Release (WRC), PrimeCare Medical, and a host of treatment centers and community resources. The process includes case planning, referrals to CMU and Dauphin County D&A, and level-of-care recommendations from these programs, which inform the reentry plan. At revocation hearings, Dauphin County Adult Probation suggests sentences based on developed reentry plans. The goal of every meeting is to ensure comprehensive information sharing and to finalize substantive MH reentry plans to ensure continuity of care through continuous case management and collaborative planning.

Continuous case management throughout incarceration ensures that plan adherence increases the potential for successful reentry and lowers recidivism rates. Upon release, CMU/KICM and/or Dauphin County D&A continue case management. Data is currently being tracked to indicate the number of Mental Health Reentry Plans completed and the recidivism rate of those with completed plans, as well as the rate of success.

Mental Health Reentry Coordinators screen for inmate eligibility in Dauphin County Problem Solving Courts, Recovery Connection Court (RCC), or Mental Illness/Substance Abuse (MISA) Planning upon entry. Additionally, coordinators conduct assessments and referrals for eligible individuals, collaborate with Dauphin County Problem Solving Courts and Recovery teams, and participate in Mental Health Court, MISA, and RCC as team members.

TREATMENT Education Report 2023

Derrick Hartman, Teacher

Dauphin County Prison's Education Department provides a variety of educational programs. Educational staff members demonstrate dedication and professionalism and are instrumental in ensuring that eligible, interested, and motivated students have an opportunity to participate in the education program. Our belief is that education is the way for our students to open new doors and enrich the quality of their lives. We strive to produce an environment of mutual respect. We aspire for residents to carry this sense of respect with them beyond their release, into every facet of their lives, after being immersed in the educational environment of Dauphin County Prison.

The Education Department seeks to assist in the rehabilitation of the resident population by providing educational opportunities to improve academic and life skills, thereby providing students with the tools necessary to become productive members of society.

Adult Basic Education (ABE), General Educational Development (GED) Preparatory Studies, English as a Second Language (ESL):

The Education Department continues the tradition of providing quality adult education to residents who want to better their basic educational skills, work skills, and/or mastery of the English language, as well as prepare for the GED test. The programs offered within the Prison to classified and non-disciplinary residents are as follows:

Adult Basic Education (ABE) and General Educational Development (GED) Programs are offered to males housed in Mainside and to Spring Creek resident workers. These programs are funded by state and federal funds administered through the Pennsylvania Department of Education and Dauphin County. Education classes for these programs are conducted by one full-time and one part-time instructor.

ABE and GED Programs are also offered to the female population and male residents housed in protective custody, maximum security blocks in the POD, and Spring Creek.

ESL services provided by Tri-County OIC and literary services provided through Pennsylvania Literacy Council are scheduled to resume in 2024.

Those enrolled in the above-listed educational classes received a minimum of 12 instructional hours each while incarcerated. Each student must have at least 12 hours of instruction in order to be counted as a student. Students increased their reading, language, math, and related educational skills as measured by the Pennsylvania Department of Education's approved assessments: **TABE (Test of Adult Basic Education)**.

For 2023, Dauphin County Prison provided the **HiSET** test under the administration of Tri-County OIC staff. In 2023, the Education Department in conjunction with Tri-County OIC, administered 99 subject tests to 27 residents, with 16 students completing all five of the exams to earn their HiSET Diploma.

For the twelfth year, five adult education providers comprising the Tri-County Consortium applied for Pennsylvania Department of Education grant funding as a group, with Tri-County Opportunities Industrialization Center (TRI-County OIC) handling the fiscal duties. The following agencies contracted with TRI-County OIC: Dauphin County Prison, Harrisburg Area Community College, Catholic Charities Immigration and Refugee Services, Perry County Literacy Council, and Carlisle Employment Skills Center.

ACT 48:

The General Assembly of Pennsylvania enacted ACT 48 in 2000, a law that mandates that all PA certified teachers must attend training to maintain an active status for teaching certificates. All Dauphin County Prison teachers are required to have a current PA teaching certificate. Teachers earn credits through courses located through both their own efforts and on the paadultresources.org website.

Library Services:

Legal materials are provided to all residents on their personal tablets. Dauphin County Prison uses the LexisNexis legal database. LexisNexis material is updated daily, allowing residents the most up-to-date information available. Legal forms are provided through requests slips to the Law Librarian.

Each week there are on average between 10 and 20 Pro-Se residents utilizing computers in the Law Library to view their discoveries, or to type motions and other related legal documentation to send to the court system.

The Law Librarian copied, stamped, and distributed 7,035 pieces of legal mail to residents throughout the course of the year.

Weekly law library sessions are provided to Pro-Se residents for typing motions for criminal cases. Copies of legal work are also provided through request slips to the Law Librarian. In 2023, there were 1,557 request slips submitted for forms, copies, addresses, and other various law library-related inquiries.

Leisure reading materials provided by the Dauphin County Library Services are available on all tablets free of charge. Books can be checked out to read on individual tablets.

School Age Youth Program:

Under the Juvenile Act, Central Dauphin School District continues to provide educational services to incarcerated juveniles (under age 18 or special needs students under age 22). During the 2022-2023 school year, (5) juvenile residents completed the high school curriculum and received a high school diploma from the following school districts: Central Dauphin (5).

TREATMENT

Religious Services Report

2023

Chaplain Alfred Sloan, MAR., Associate Chaplain Damon Wagner Fields, and
Contracted Chaplain Linda Thompson

Introduction:

The Dauphin County Prison Chaplaincy staff provided pastoral care for the residents in various ways including, but not limited to, providing support and arrangements for religious leaders of the community for clergy visitation, supporting/assisting volunteers leading religious programs, coordinating with Prison staff to assure timely pastoral care and response to residents requests, coordinating programs to assist inmates in their faith journey, and providing service and leadership in the community.

The chaplains provided daily and weekly religious programming and facilitated the offering of major religious observances for Christian, Muslim, Jewish, and Native American faiths. The needs of all faith groups are valued, and attempts are made consistently to meet their religious needs.

Summary of Religious Service and Program Provision:

In 2023, staff chaplains interviewed 3,696 new residents to accurately determine religious preference, provide spiritual resources, arrange for spiritual advisor visitations, and arrange for worship and program activities and schedule events in their faith groups. Staff chaplains recorded 3,078 brief pastoral care sessions with residents. In addition, 917 significant pastoral care sessions were documented, and 466 in-depth counseling sessions and 127 emergency notifications were conducted.

Religious services, prayer services, and religious education classes were led by staff chaplains. Provisions were made for residents of faith preferences without available local spiritual leadership to attend similar services and programs, with the concurrence of officials of that faith group (i.e., Mormon, Rastafarian, and Orthodox).

The staff chaplains provided daily call sheets for the religious programs, entered interview data for the religious programming desired by the residents, assisted with clergy clearances, assisted with phone inquiries and notifications, and assisted in responding to resident's request forms. Chaplains also developed, implemented, and refined a system to accurately, effectively, and efficiently document/track contacts and services provided to residents and staff.

Highlights for 2023:

- Ecumenical Services were expanded to more than 10 services throughout the week.
- Chapel Talks were held by our ministerial volunteers.
- Volunteer Block Chaplains were stationed on the Block B, C, D, E, F, J, and K

Training and Continuing Education for Staff Chaplains:

Professional correctional chaplains have mandated training. In order to meet the requirements to maintain or attain certification as a correctional chaplain and to grow in proficiency, all staff chaplains were provided the following training in 2023:

- Suicide Prevention & Intervention
- Key Control
- Emergency Plans
- PREA
- Fire Safety
- CPR/First Aid/AED
- Policy Review
- CISM
- LGBTI+
- Mail
- DCP Transports
- Phoenix Training: Addictions and Connections to Treatment
- Pennsylvania Prison Chaplains Association Conference (Sloan, Fields)
- Correctional Chaplains Training, CCT 2201 (Thompson)
- Art and Spiritual Care: Exploring Art Therapy (Sloan)

Community Service and Leadership Provided by the Prison Chaplains:

Chaplain Alfred Sloan supervised Contracted Chaplain Linda Thompson as she conducted religious interviews, supervised trustees, kept religious inventory logbooks updated, provided pastoral care for classification block resident, performed clerical tasks of data entry, and responded to written inmate requests, which included dietary restrictions, religious changes, and specific religious items. Chaplain Sloan also conducted self-care discussions and weekly chaplains' meetings that were designed to strengthen staff morale and create continuity.

Chaplain Damon Wagner Fields served as secretary of the monthly (CCU) Prison Action Committee (PAC) Zoom meetings. He also attended CCU Work Release Worship Steering Committee meetings, CCU Ministries Committee meetings, and Dauphin County Reentry Coalition Zoom meetings. He provided leadership for the Community Connections Reentry Breakfasts, which were restarted in September. He attended the annual Spring Assembly meeting of Christian Churches United.

Conclusion:

Prison ministry at Dauphin County Prison in 2023 continued to offer vital support to the Treatment Department. The year 2023 presented many challenges for staff, volunteers, and residents as the prison experienced an unusually high rate of lock downs. However, everyone was able to adjust and adapt to the new circumstances, situations, and conditions. The Chaplains strived to facilitate opportunities for all the residents to grow in their religion while incarcerated.

Dauphin County Prison

Population Summary by Religion for Year 2023

<i>Religion</i>	<i>Avg. Population</i>	<i>Percentage</i>
Protestant	591	59.01%
Catholic	104	10.04%
No Religion	139	11.06%
Muslim	81	8.01%
Jewish	81	8.01%
Unknown	33	2.73%
Jehovah's Witness	12	0.99%
Rastafarian	5	0.41%
Buddhist	4	0.33%
Other	4	0.33%
Orthodox	3	0.25%
Atheist	3	0.25%
Hebrew Israelites	1	0.08%
Seventh Day Adventist	1	0.08%
Native American	1	0.08%
WICCA Old Religion	1	0.08%
Hindu	1	0.08%

Attendance Number for Services:

The average number of Muslim inmates who attended Jumah was 13.0 per service held. All attendees were men; no women attended.

The average attendance for the Ecumenical Christian Services was 7.25 for all, with 6.5 being men and 10.6 being women.

Calendar Religious Events Attendance

- Fast of Esther/Purim 13
- Passover 30
- Rosh Hashanah 35
- Yom Kippur 10
- Ramadan 60
- Eid-ul-Fitr 50
- Eid-ul-Adha 44
- Hanukkah 24
- Green Corn Feast 1

DAUPHIN COUNTY PRISON
YEAR-END REPORT
2023

PART 4

**OPERATIONS
REPORT**

Deputy Warden
Bruce LeValley

OPERATIONS

Year-End Report

2023

Bruce LeValley, Deputy Warden of Operations

Business Office:

The facility Business Office coordinates the revenue and payment functions for the facility. They work closely with Maintenance Staff to ensure that vendors are available as needed, payments are processed on time, and that budgets are adhered to. The Business Office also works with contracted vendors to ensure services are provided as contracted at agreed upon rates to safeguard county funds. The Business Office works with staff throughout the facility to ensure supplies needed for daily operations are available when needed. This has been a challenge during the supply chain issues that have appeared in the last two years. Additionally, they work with the inmate population to maintain inmate accounts, manage billing for housing fees, mediate any disputes with commissary issuance and work with Security to provide inmate funds upon the release of an inmate housed at the Dauphin County Prison. The Business Office manages thousands of transactions annually. One of the new functions the Business Office manages is the inmate pay program that was instituted in 2023. All inmates assigned to facility jobs are now paid \$.50 per hour for their work.

Maintenance Department:

The facility Maintenance Department continues to maintain the physical plant in addition to completing and overseeing large scale projects. The chart below details 3,396 work orders tracked in the facility maintenance software. Of these jobs, 2,638 were corrective work orders and 758 were planned work orders of scheduled preventative maintenance projects. In addition to these work orders, the Maintenance Department finished the project to install fencing to create outdoor recreation areas for the inmate population and oversaw the installation of a heating and cooling project on L and M blocks, providing direct heating and cooling into the individual cells; They also oversaw the installation of food trap doors on all cells on P and Q blocks that did not have them. Outdated electrical panels were replaced throughout the Mainside housing control areas. The Property/Booking area was modified to allow for the installation of a full body scanner. The pharmacy door was replaced to provide additional security, and KeyTrak key management boxes were installed in the Medical Unit, the Judicial Center, and the Administration area to improve key management. Chain link fencing was removed from A block and replaced with a netting system. Chain link fencing was removed from B-block and 4 units on P-block and replaced with galvanized railings to improve staff and inmate safety. The Maintenance area accomplished the above body of work with a 30%-40% vacancy rate throughout the year. Even with reduced staffing, the Maintenance Department demonstrated a strong commitment to maintaining the facility and correcting issues promptly by completing 98% of the work orders in less than one week.

% of WOs Completed in Less than Week by Year

TOTAL NUMBER OF WORK ORDERS BY YEAR

WOs by Month/Year

As mentioned, the Maintenance Department puts significant effort into maintaining the physical plant of the facility through preventative maintenance. The chart below gives an approximation of the number of hours spent on preventative maintenance but may not capture the hours spent by more than one individual on the same project.

Food Service:

The food service function at Dauphin County Prison is contracted to Aramark Food Services. Aramark Food Services has continually provided food service to the prison since 2016. The food service contract was offered out for public bid in 2022 and Aramark Food Services was the winning bidder. Aramark upgraded their menu for the inmate population and extended the hours for the Officer's Dining Room where they provide meals to staff. Aramark provided food and beverage services for many events in the prison, including senior staff meetings and special events. Overall, Aramark provided over 1,029,547 meals to the inmate population during the calendar year of 2023. Due to a change in the facility's classification policy, the kitchen is producing this volume of meals with a smaller inmate crew. The inmate work crew is now paid \$.50 per hour for their work in food service.

Commissary:

Oasis Management Systems, Inc. has the privilege of partnering with the Dauphin County Prison for over 20 years, providing a complete commissary operation for the inmate population of the Dauphin County Prison. Inmates are provided the opportunity once each week to purchase commissary supplies, which include clothing, hygiene items, snacks, beverages, and over-the-counter medications. Commissary purchases are made using the funds available in an inmate's individual account.

Dauphin County Prison is serviced from Oasis' Altoona distribution center, located at 916 31st Street, Altoona, PA 16601. This distribution center continues to be the most successful and accurate packaging facility in the country. This distribution center helps Oasis achieve its goal of filling 100% of orders with no shortages or substitutions of products. Oasis also distributes the commissary orders directly to the inmates. In 2023, Oasis processed 20,578 commissary orders for the inmates of the Dauphin County Prison. Our mission is to provide a quality commissary

program and continue to help Dauphin County Prison achieve its goals regarding commissary at the facility.

Phone and Tablet Services

Telephone, tablet, and video visit services are provided by ViaPath (formerly GTL). The facility provides the resources through its contract with ViaPath for the inmate population to stay in contact with friends and family. Inmates can make telephone calls from phones installed on their housing unit using a prepaid account or by collect call. Each inmate is assigned their own tablet, so they have the ability to reach out to friends and family via video visits and messaging now. The tablets operate off Wi-Fi, so they have daily access to these features. The tablets also provide access to a growing lending library and a law library as well as functioning as the delivery vehicle for US Mail. The table below provides a summary of the volume of activity on the tablets for 2023.

Completed video visits	297,715
Messages	2,621,670
Photos delivered	56,411
Tablet sessions	3,911,760
Telephone calls	719,349

Health care services:

The year of 2023 built on the momentum of 2022 and saw PrimeCare Medical, Inc. and its staff at Dauphin County Prison tackle complex medical illnesses, COVID-19, high risk pregnancies, severe mental health cases, rapid inmate/patient turnover, threats of patient health care litigation, the shortage of licensed nurses throughout the country, and an increasing aging population who finds themselves incarcerated. These combined factors continue to create a unique healthcare environment inside the prison system. Despite these challenges, PrimeCare Medical, Inc. was able to apply lessons learned in 2022 that put Dauphin County Prison's Medical Department on track to improve the health care provision of the patients housed at Dauphin County Prison.

PrimeCare Medical, Inc. continues to search for new and innovative methods for adapting and overcoming the myriad of obstacles that continue to confront the Dauphin County Prison. Despite COVID-19 ending as a national health crisis in 2023, the landscape of medical care in the community continued to change as those challenges and hurdles that began during COVID continued. Medical practices and hospitals continue to experience staffing shortages and a lack of institutional medical care, as experienced health care providers have hung up their stethoscopes, paving the way for new and inexperienced staff to take their place. This created a gap in patient care, leading to longer-than-ever wait times for appointments (months instead of weeks) and an inability for people to access healthcare in a timely fashion in the community.

Even so, PrimeCare Medical, Inc. was able to recruit and hire a medical director with extensive and profound medical knowledge as well as experience operating in scenarios where the lack of resources was a familiar experience. Dr. Demetriou joined the PrimeCare Medical, Inc. team at

Dauphin County Prison full time in the middle of 2023, lending his vast experience from military and hospital medicine to the prison population. In addition, PrimeCare Medical, Inc. increased the provider team by employing three highly qualified, knowledgeable, and professional individuals (two physicians assistants and a nurse practitioner) who have raised the bar for the provision of medical care for incarcerated individuals above that which can be expected in the modern community healthcare system. While many of our patients were unable to access preventative care in the community, patients at the Dauphin County Prison typically wait less than a week to see a provider to address the complex and fragile medical issues plaguing an already high-risk population. There was also an increase in individuals diagnosed with serious mental illnesses being committed to the prison system. With the lack of community resources, discharge and release planning remains a complicated process.

The shortage of state psychiatric hospital beds continues to place the burden of stabilization and treatment for this marginalized population on the county jails, stretching already depleted and overworked resources. PrimeCare Medical, Inc. remains committed to reducing the impact of incarceration to those struggling with serious mental illness, and as such, has taken an active role in collaborating with county agencies in the discussion and development of county resources to support this frail population. Through our continued partnership with Dauphin County's Stepping Up Initiative and MISA Group, those individuals identified as seriously mentally ill or in need of services as a result of their mental health diagnosis have received ongoing case management and consultation with the goal of improving release planning and diversion into the community. PrimeCare Medical, Inc. continues to work with the Pennsylvania Behavioral Health Commission to assist in reducing those individuals who require inpatient hospitalization in order to be restored to competency for trial. In addition to these initiatives, PrimeCare Medical, Inc. and MHIDD began holding weekly meetings in the last quarter of 2023 that include the Treatment Department and Jail Diversion to target those individuals with serious mental illness and who are struggling with release planning in an attempt to improve discharge success and to end the gap in services for those individuals with serious mental illness being released to the community. Working together, PrimeCare Medical, Inc. and Dauphin County have been able to support those most vulnerable and fragile in an ever-changing, dynamic treatment environment.

Over the course of 2023, discussions surrounding Medication Assisted Treatment (MAT) Programs of incarcerated individuals continued. Currently at Dauphin County Prison, those individuals receiving MAT Programming in the community are continued on their MAT treatment upon commitment at the Dauphin County Prison. With the change in DEA regulations allowing general practitioners to prescribe medications for opioid use disorder, the number of individuals receiving MAT programming increased by more than double in 2023. The need for treatment continues to grow in Dauphin County Prison. PrimeCare Medical, Inc. has experience working with this population of individuals at numerous facilities and is encouraged by the discussions with Dauphin County Prison Administration to add to this type of treatment on a broader scale to those individuals who struggle with addiction issues. Experience illustrates that those who initiate treatment while incarcerated experience fewer incidences of relapse and overdose as well as reduced recidivism within the criminal justice system. PrimeCare Medical, Inc. is motivated to improve patient care in this arena to better community outcomes and patient care. As a result, an initiative was launched that brought county stakeholders together on a biweekly basis to discuss the challenges and hurdles to providing this care to this growing population. As a result, an

interdisciplinary team was launched that meets weekly and reviews those individuals receiving Drug and Alcohol/MAT treatment inside the Dauphin County Prison to coordinate and prevent duplication of services as well as improve release planning, creating a warm handoff to community resources as people exit the prison system and return to the community.

Significant staff turnover continued through 2023 within the medical department. After the analysis of the onsite supervisory staff by President Brent Bavington, MBA, CCHP; CEO Thomas Weber, Esq; and COO Todd Haskins, RN, BSN, CCHP in 2022, improvements in operations continued as a focus for Dauphin County Prison. The leadership roster of Vice President Kelly Ehrich, RN, BSN, MBA, CCHP; Regional Manager Kelly Rhoads, LPN, CCHP; and Justin Lensbower, MS, LPC serving as the acting Health Services Administrator continued. In addition, Director of Nursing, Kayla Zeiders, and Assistant Director of Nursing, Autumn Brennan, were added to continue to improve the staffing structure of the medical department. The commitment to increase the number of man hours required to accomplish and attend to the increased patient care needs that find their way into the Dauphin County Prison was maintained throughout 2023 with staffing hours increased to an average of 1500 hours per month over contract. Working collaboratively with Prison Administration, the Medical Department continued to restructure operations to streamline health care provision and improve the access to care available to patients while improving the quality of the care provided.

General Health Care Workload:

The Medical Director, Physician's Assistant, and Certified Registered Nurse Practitioner assessed and treated 9,116 inmates/patients on sick call line in 2023. This is an increase of 1,528 patient contacts from 2022. PrimeCare Medical, Inc. continues to strive to provide the highest quality of healthcare available to its ever-demanding inmate/patient population. The Nursing Staff answered 1,540 sick call requests in 2023, which is a decrease of 532 from the previous year.

There were 150 hospital admissions in 2023, totaling 620 patient days. This is an increase of 157 patient days from the 463 days in 2022 and approaches pandemic level of hospitalization cases. These statistics provide a clear indication of the acuity levels with critically ill and infected inmates/patients. These statistics also reinforce the importance for daily communication between PrimeCare Medical, Inc. and the Dauphin County Prison Treatment Department in keeping the criminal justice system involved with these critically ill inmates/patients.

There were 12,967 inmate/patient encounters by Mental Health providers in 2023, an increase of 1,763 patient contacts from the previous year. There were 17 involuntary mental health commitments in 2023, which was a decrease of 14 patients from the previous year.

Dental evaluations totaled 1,296 for the year. This is a decrease of 102 evaluations from the 2022 statistics.

Ancillary Services:

There were 4,282 tuberculin tests administered in 2023; of which, none were replied positive. This is a decrease of 300 tests from 2022. There were 4,065 receiving screenings completed in 2023, an increase of 37 from last year. There were 2,567 intake physical examinations and 318 annual physicals completed in 2023, an increase of 233 total physicals from the previous year.

Consultant Services:

There were 858 outside consultation visits for medical evaluations provided this year. This is a decrease of 176 from 2022. Of the total medical consults, there were 309 emergency room visits in 2023, a decrease of 42 from 2022.

Communicable Diseases:

There was a total of 174 HIV-positive inmates/patients in 2023, a decrease of 43 HIV-positive inmates/patients from 2022.

There were 4 inmates/patients isolated for MRSA precautions, with 2 cases confirmed via laboratory testing. This is a decrease of 18 suspected cases and 9 confirmed cases from the 2022 statistics. There were no specific areas of the facility suspected or identified as causing MRSA outbreaks.

There were no active cases of tuberculosis in the Prison in 2023.

There were 28 cases of sexually transmitted diseases in 2023.

NCCHC Accreditation:

This Prison Accreditation was continuously maintained throughout 2023. In December 2023, the Dauphin County Prison went through their National Commission on Correctional Healthcare Survey. The survey went well, with one issue noted for correction, which was a requirement for staggered 15-minute suicide watch checks conducted by the correctional officers. There is a process and outcome study being completed with corrective action being implemented to correct the deficiency bringing Dauphin County Prison into compliance and maintaining the NCCHC Accreditation for another 3 years.

Included for review is the PrimeCare Medical, Inc. 2023 End-of-Year Statistical Summary Report.

DAUPHIN COUNTY PRISON
YEAR-END REPORT
2023

PART 5

Statistics

STATISTICS, CHARTS & GRAPHS

2023

DiAndra Pena, Litigation & Policy Coordinator & Emilia Rodriguez, Executive Assistant

Introduction:

Included in this section are numerous charts, tables, and graphs that provide demographic information about the inmate population of Dauphin County Prison. Data on age, gender, race, length of sentence, juveniles, recidivism, fully sentenced percentages, average numbers of Work Release inmates, and average daily population of the facility are presented in this section. As appropriate, comparative figures are given for prior years.

On some charts, the data is derived from a weekly “snapshot” of the Prison population. These weekly figures are then used to calculate monthly and annual averages. It is important to note, therefore, that some of the statistical information is an approximation. The information provided on monthly average population is computer-generated on a daily basis at two minutes past 12:00 midnight. These figures include the Prison population, as well as Prison inmates transferred to both the Male and Female Work Release Centers.

Statistical Trending:

- The average in-house population figure rose slightly from the prior year to 940. The highest average total population and the highest average in-house population both occurred in September. Of note, the average total population in 2023 was 1,067 compared to 1,053 in 2022.
- There was a change in the average populations for both males and females at the Work Release Center. The male average population decreased from 106 in 2022 to 103 in 2023. The female average population increased from 22 females in 2022 to 24 in 2023.
- The age group 30-39 was the greatest percentage of the total population, increasing 1.9% from 2022. Age groups 26-29 and 40-49 showed slight decreases in their percentages of the total population while the remaining age groups remained fairly constant. The 2023 monthly average juvenile population remained the same from 2022, while the total number of juveniles committed to Dauphin County Prison increased from 9 in 2022 to 10 in 2023.
- The population race compositions remained fairly constant from 2022; however, there was a slight increase in the Asian male and Hispanic female populations. The race composition among other males and females generally remained consistent with the prior year.
- The yearly average of fully sentenced inmates decreased from 17.0% in 2022 to 15.3% in 2023.

The following graphs and charts provide data that was tracked in 2023.

TEN-YEAR COMPARISON OF MONTHLY AVERAGE POPULATION: 2014 - 2023
In-house and both Work Release Centers

May 2024

Dear Reader:

This concludes the reported summary of Dauphin County Prison's statistics and data from operations during the year 2023. Much time, thought, and consideration was put into the collection and presentation of the data in this report as it spans the majority of the prison's activity in great detail.

We would like to thank all of the contributors to this report for not only tracking, recording, and providing their data in a detailed and concise manner, but for their dedicated work, attention to detail, and commitment to the facility. As stated in many of the preceding reports, Dauphin County Prison has faced facility-wide staffing shortages that have greatly impacted the day-to-day practices and operation of the facility. Even so, the efforts of our contributors to their respective departments has been invaluable to the facility in ensuring the uninterrupted continuation of facility functions, support of staff, and supervision of the inmate population. We are grateful for the continued efforts of staff toward the maintenance and improvement of Dauphin County Prison and recognize their integrity. We also thank the Prison Board of Inspectors for their support and dedication to continued improvement.

As we commence with prison operations for the 2024 calendar year, it is our mission to continue to receive and consider feedback from the inmate population, prison staff, and Dauphin County community for the continued and consistent betterment of the facility.

We welcome feedback and encourage the use of the Prison Board of Inspectors email address DCPrisonBoard@dauphincounty.gov.

Sincerely,

John T. Bey
Director of Criminal Justice

Gregory C. Briggs
Warden
